

Tommy Nellen

Science Project Assignment:

1. Create either an animal or plant cell using any materials except pen,paper or pencil.
2. Label clearly the parts of the cell and provide a key.
3. Be ready to present to the class and describe the functions of the parts of the cell.

Science Project:

1. I created a plant cell using gum of different colors, toothpicks, pasta strands,sugar cubes,twine,pipe cleaners, and plastic straws.
2. I then froze the cell in the freezer. I labeled the cell parts with toothpicks and post its.
3. I was the first one to present my cell in my oral presentation and received a grade in the 90s.
